Web File Storage

This is a template for creating applications using Next.js 13 (app directory) and NextUI (v2).

Operating Systems

- Ubuntu 22.04
- Windows 11
- MacOS 14.0

Programming Languages and Technologies Used

- TypeScript
- Next.js 13
- MongoDB
- NextUI v2
- Tailwind CSS

Runtime Environment

- Node.js 20.8.0

Database and Storage

- MongoDB to store the file information
- Local file system (serverside) to store the file

How to Use

- Clone this repository
- Setup MongoDB (see here)
- Start MongoDB
- Create the database: `npm run create-db` (note: only do this to set up the database or if you want to reset the database)
- Install the dependencies: `npm install`
- Start the development server: `npm run dev`
- Or build and start the production server: `npm run build && npm run start`
